

This installation guide provides step-by-step instruction on how to properly install an EziBlank 6RU Blanking Panel onto a 19" square-hole mounting rack cabinet.

EziBlank 6RU blanking panel

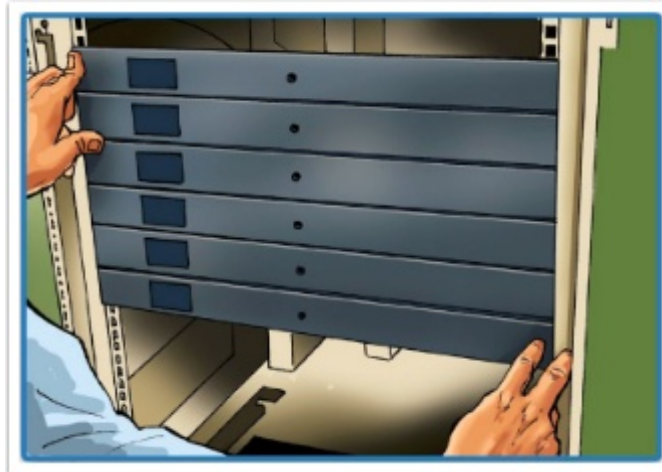

Aligning the panel to the designated rack space

Align the panel to the designated position, ensure that the mounting clips are centered to the middle square mounting holes.

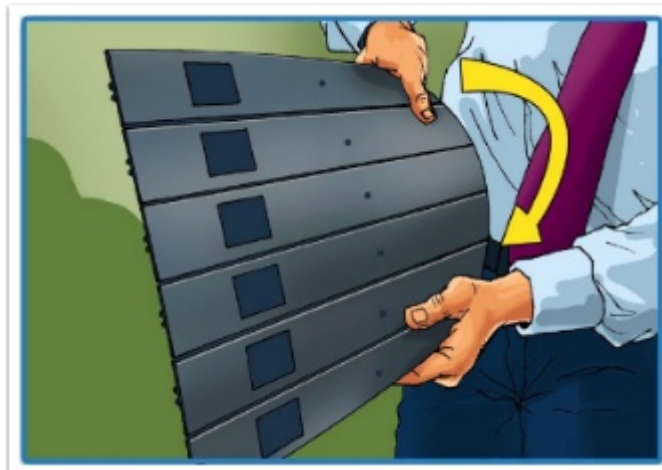

Securing the panel onto the mounting rails

Press firmly on to the panel until it is securely mounted onto the mounting rails.

Separating individual panel combinations - 1

To separate individual panel combinations, hold firmly onto the conjoining panels and bend along the v-cut.

Separating individual panel combinations - 2

Flex the panel until it is separated into two parts.

Separating individual panel combinations - 3

Install the subset of panels onto the designated rack space as per the previous instruction.
